STRIP SERIES**

**SPHERICAL
U-FORMED CLIP-ON
SERIES**

As one of the most versatile series of parts, the "Contact Series," with the spherically formed fingers, lends itself to a variety of applications. This series is produced as flat strips, "U-formed" strip and "U-formed" clip-on strips. In addition, the flat strips and "U-formed" strips can be rolled into rings, of various sizes, in order to accommodate cylindrical contact applications.

applications. All strips can be cut to a specified lengths as required. In order to prevent fracturing or deformation of fingers while functioning, these parts should be mounted so that the deflection forces are applied in one of the directions shown in Figure No. 1. All strips, other than the clip-on strips, can be provided with an attached conductive adhesive transfer tape for ease of mounting.
